AMENDMENTS TO THE SPECIFICATION

Please amend paragraph [0019] as follows:

[0019] The X-ray emitter further comprises an anode assembly 20 provided with an anode 21 in the shape of a disc, a rotating part 22 supporting the anode 21 and a non-rotating part 23 supporting the rotating part ~~[[21]]~~ 22 and being fastened at its respective ends to the body 16. The anode 21 is placed in the central portion 18 of the body 16 and the rotating 22 and non-rotating 23 parts are mainly placed in the cylindrical portion 17 of the body 16. Alternatively, it would be possible to design a non-rotating part fastened at only one of its ends to the body 16. Bearings 24 are placed between the non-rotating part 23 and the rotating part 22 in order to allow high-speed rotation of the rotating part 22.
